

## **adidas Originals eyewear: Tokyo**

Infinite freedom in both thinking and fashion – that is what the 1970s were all about. adidas Originals eyewear picks up this light-hearted attitude to life in the Tokyo sunglasses in Infinity Design. No limits, no rules, just infinite style.

The colours: eye-catching and bright. The design: infinitely cool. With the Tokyo from adidas Originals eyewear, you are making a fashion statement. Inspired by the 1970s lifestyle, these sunglasses with large lenses and sophisticated front frames feature the Infinity design - two colours combine to create a shape similar to a figure of eight, resulting in a flowing effect. The Tokyo is available in four colour variants, yellow/melon, black/white, petrol/mint and plum/lilac. The three-leaf logo features on the outside of the temples, completing the look.

Like all the models in the adidas eyewear collection, the Tokyo is manufactured by the respected eyewear producer Silhouette International.
